## SPECIFICATIONS

Blockouts shall be made of timber with a stress grade of at least 1,160 psi [8 MPa]. Grading shall be in accordance with the rules of the West Coast Lumber Inspection Bureau, Southern Pine Inspection Bureau, or other timber association. Timber for blockouts shall be either rough sawn (un-planed) or S4S (surface 4 sides) with nominal dimensions as indicated. The variation in size of the blockout in the direction parallel with the axis of the bolt shall not be more than  $\frac{1}{4}$ " [6]. Only one type of surface finish shall be used for posts and blockouts in any one continuous length of guardrail.

All timber shall receive a preservation treatment in accordance with AASHTO M-133 after all end cuts are made and holes are drilled.

Dimensional tolerances not shown or implied are intended to be those consistent with the proper functioning of the part, including its appearance and accepted manufacturing practices.

The blockouts shall conform to the following regulations:

| Designator | Wood Type      | Height                   | Depth    | Width    | Diameter of Routing, D |
|------------|----------------|--------------------------|----------|----------|------------------------|
| PDB23a-b   | Ponderosa Pine | 14 $\frac{1}{4}$ " [362] | 9" [229] | 6" [152] | 9" [229]               |
| PDB24a-b   | Ponderosa Pine | 14 $\frac{1}{4}$ " [362] | 9" [229] | 6" [152] | 9 1/8" [232]           |

## INTENDED USE

This blockout is used with the round wood post (PDE21-22) in the Strong-Post W-Beam Guardrail with Round Wood Posts (SGR04d-e).
