Drawings & specifications for these systems are at <http://users.wpi.edu/~skwirl/HardwareGuide/New/Ready/Systems/SCI17a.pdf> and <http://users.wpi.edu/~skwirl/HardwareGuide/New/Ready/Systems/SCI17b.pdf>

I think any tendencies towards advertising should be removed from description, i.e. very low ridedown, should probably read "ridedown acceleration." Also "G-force" probably should just be ridedown accelerations.
