

New drawing

Post by Administrator on 8/11/05 at 16:23

The drawing and specification for this system are at <http://users.wpi.edu/~skwirl/HardwareGuide/New/Ready/Systems/SGM22.pdf>

Re: New drawing

My comment copied from SGM23:

"Line widths are much darker and fonts are different.

Question - Are the line widths specified on the template minimums ? Or are they "definite" - with no variation allowed?

If they are minimums - then I guess it's ok these borders are much thicker. However, if the intent is to have consistency on details, I would recommend revising this detail to have lighter borders and also slightly reduced fonts to match the rest of the book. "

=====

Sheet 2 - Intended use: First sentence is confusing: " lateral transfer by a transfer vehicle" ? Maybe rephrase to "capable of rapid lateral resetting along the roadway via a transfer vehicle machine."

"low deflection" - Clarify deflection amount.

Is there a minimum length that should be specified ?
